

FAIRiCUBE Newsletter #1

“ Deliver the power of data cubes and ML to decision makers and data scientists. ”

What is FAIRiCUBE

The core objective of FAIRiCUBE is to enable players from beyond classic Earth Observation (EO) domains to provide, access, process, and share gridded data and algorithms in a FAIR and TRUSTable manner. We aim to leverage the power of Machine Learning (ML) operating on multi-thematic datacubes for a broader range of governance and research institutions from diverse fields, who at present cannot easily access and utilize these potent resources.

Upcoming events

- Presentation at Land Cover EIONET Group meeting 20/21.11. at EEA
- Presentation at Biodiversity sessions of the ESA-EC workshop on "Science for a Green and Sustainable Society" on 22-24 November 2023 in ESRIN, Frascati
- Next FAIRiCUBE status meeting is scheduled for week 26.02. – 01.03.2024
- Upcoming reporting period is scheduled in March 2024 reporting
